Our 1937 Introductions

MALIBU SUNSET—I.D. (*See illustration on front cover.*)

An informal decorative of the brightest color imaginable, gold overlaid scarlet, with long, straight petaloids throughout the flower. A 10-inch bloom of corresponding depth on good strong and slender stems. This is the dahlia that caused more comment in our garden this past summer than anything else in bloom.

Roots \$10.00 Plants \$5.00

MITSI GALE—S.C.

A semi-cactus of beautiful rosy lavender color; Ridgeway names it a rosolane purple. Good form. Size from 9 to 11 inches in diameter. Foliage is fernlike and abundant. Stems excellent.

Roots \$10.00 Plants \$5.00

FREDERICKA (Miniature)—F.D.

Color is deep red with a suggestion of lavender on the reverse. This miniature won first at the Long Beach Show, and also at the Southern California Dahlia Show at Pomona as the best undisseminated MINIATURE SEEDLING. A good cut flower. Stock limited.

Plants \$1.00

Our Introductions for 1935-1936

ANALEE McCLURE—I.D. to S.C. (Broomall)

A beautiful WHITE. Flowers average 10 to 12 inches, with good depth. Stem stiff and cane-like. The flowers facing, never droops or hangs its head.

Roots \$5.00 Plants \$2.50

ANNA MAY WONG (Stephenson) I.D.

This is a huge flower. In color, a bright spectrum red with a light reverse. The twist and curl of the petals give a silvery sheen to the tips and adds much to the beauty of the bloom. Stems and foliage good.

Roots \$5.00 Plants \$2.50

BING CROSBY—I.D.

Color—Golden YELLOW penciled with CARMINE. A seedling of La Fiesta, carrying the same general tones; the stem is perfect, carrying the bloom erect and facing you. ACHIEVEMENT MEDAL Winner at the Los Angeles Show 1934.

Roots \$2.50 Plants \$1.25

BROOMALL'S PINK—(Broomall-Stephenson)

This is a dahlia Mr. Broomall considers fine enough to give it his name. It is outstanding in color, a TRUE ROSE PINK, and the heavy substance and texture of the petals give it a beautiful velvety appearance. It is semi-cactus in form and is easily grown 10 to 12 inches with good depth. Stems and foliage excellent.

Roots \$10.00 Plants \$5.00

RITA CANSINO (Stephenson)—I.D.

This dahlia is lemon yellow in color, splashed with rich carmine. Stems excellent. The flower has size and depth.

Roots \$5.00 Plants \$2.50

RUTH ELDER (Broomall)—I.D.

A beautiful light JASPER RED and CORAL. Blooms average 11 inches with good depth. Has very heavy dark foliage that is fully insect-resistant. Very prolific bloomer.

Roots \$1.00 Plants \$.50

SHIRLEY TEMPLE (Ball)

Clear, glistening yellow with blooms that average 4 inches on perfect stems. A wonderful keeper and a great favorite with the florist.

Roots \$1.00 Plants \$.50

Other Introductions for 1937

These are our selections from the new dahlias offered by the growers throughout the country. We can supply you with good strong plants, grown under a temperature of 65 degrees and well hardened, ready to set out in your garden. We ship plants anywhere and with the best of results.

AMERICAN PURITY (J. Nuneviller)—S.C.

JOIN THE AMERICAN DAHLIA SOCIETY

We invite our friends and customers to join the American Dahlia Society and become a part of this great National organization whose interest is devoted solely to the improvement of the Dahlia.

The Quarterly Bulletin—a real Dahlia Magazine—gives all the up to date Dahlia news, information about, and illustrations of new varieties, the latest cultural hints and is a real worth while guide to any lover of Dahlias. The Bulletin alone is worth many times the cost of the annual dues.

Trial Gardens are maintained at Connecticut College, Storrs, Connecticut, and The Michigan Agricultural College, East Lansing, Michigan, where new varieties are tested and scored each year. A test garden is also maintained at Cornell University, Ithaca, New York, for research work on insect and disease control. Full reports from all these gardens are published from time to time.

Dahlia “fans” in every state of the Union and many foreign countries are members and frequently contribute news to the Bulletin. Membership includes admission, and the privilege of exhibiting at all our National exhibitions which are held each September in some National center.

Dues \$2.00 per year
Payable in advance

Foreign Varieties

We grow many imported varieties, many of them not released. We had planned to offer plants of these this season, but, owing to the loss of stock, due to our most severe winter for which we were not prepared, are unable to this year.

"CALIFORNIA'S FINEST SEED"

Our seed is selected only from the largest and finest varieties, grown and ripened under ideal conditions. The garden is planned and planted to get the best possible results from cross-pollenization. We do not hand-pollenize but use bees to do this work in Nature's own way. There is no finer seed produced, and we have many letters from large Eastern and Mid-West growers to substantiate this statement. They are growing prizewinners. Why not you? Such seed is never plentiful and the better seed you plant, the greater your opportunity to originate a new and finer dahlia.

We can supply this seed in mixture or one named parentage.

**20 Seed, \$1.00; 100 Seed, \$5.00;
1000 Seed, \$40 — Net Price**

Dahlia Plants

are sprouts or cuttings taken from stock of named varieties, started early in the greenhouse, rooted in sand benches, potted and grown inside until established, then moved to cold frames for hardening off, ready for shipping and field planting.

If you do not grow your dahlias from green plants, we suggest that you give them a trial, for, when properly grown from healthy stock and given the care that any plant requires, they will give you better blooms and will make a nice clump of roots for future plantings. However, they must be cultivated and watered, and, if insects bother, sprayed with an insecticide.

Dahlia Green Plants are ready for shipment after April 15, and will bloom at about the same time as roots that have been planted three weeks earlier. The price of plants is one-half or less than the price of roots of the same variety. We recommend their use very highly, especially for our local conditions in Southern California.
